IMPORTANT NOTES (Refer to TECHNICAL GUIDE)

Marble Institute of America, Soundness Group A – Marbles with uniform and favorable working qualities, containing no obvious geological voids or fissures. These stones normally do not require any filling or patching. ■ White thin-set or mortar is recommended. ■ Etching caused by acidic foods will be less visible on a honed surface than on a high polished surface.

DISCLAIMER

Natural stone is a product subject to important variations in patterns, veining and colors. Because stone is a product of nature, testing to determine specific physical qualities should be performed for each project. Pictures and technical details provide a frame of reference only.
